

How to install the plugin

MacOS

Installing

1. Close Adobe Premiere Pro.
2. Extract the .zip file and run the .pkg file.
3. The installer will launch and guide you through the installation process.
4. When the installer is complete, launch Adobe Premiere Pro.
5. To open the plugin, go to the **Window -> Extensions -> Marker Type Converter**

Troubleshooting

You should now be able to use the plugin. If the Marker Type Converter does not appear in the Extensions menu, restart your computer and restart Adobe Premiere Pro.

Updates

If you want to install a new version of the plugin, simply run the new installer. It is not necessary to uninstall the old version, the new one will overwrite everything.

Windows

Installing

1. Close Adobe Premiere Pro.
2. Extract the .zip file and run the .exe file.
3. The installer will launch and guide you through the installation process. The Windows installer requires administrator privileges.
4. After the installer completes, launch Adobe Premiere Pro.
5. To open the plugin, go to the **Window -> Extensions -> Marker Type Converter**

Uninstalling the Plugin

The plugin can be easily uninstalled from the Add/Remove Programs menu.

Troubleshooting

You should be able to use the plugin now. If the Marker Type Converter does not appear in the Extensions menu, restart your computer and then restart Adobe Premiere Pro.

Updates

If you want to install a new version of the plugin, simply run the new installer. It is not necessary to uninstall the old version, the new one will overwrite everything.

ZXP file

It is also possible on both MacOS and Windows to install the plugin extension using the ZXP file. This requires a ZXP installer. We recommend to use the installer from aescripts. (ZXP installer - aescripts + aeplugins - aescripts.com)
